Dear Hiring Manager,

I always attempt different ways to solve problems. I'm a quick and fast learner of new technologies. Over the past several years, I've been practicing TM (Transcendental Meditation), which has boosted my career as an engineer. I have around five years of experience with responsibilities ranging from driving solutions to designing, developing, testing, deploying, maintaining, and enhancing mobile applications on one or more mobile platforms using MVC, MVVM, MVP, structure, and new libraries like RxJava/RxAndroid, Jetpack(ViewModel, LiveData, Room, WorkManager, Navigation) Retrofit/Okhttp, Dagger 2, Butterknife, Picasso/Glide, Timber, Otto(EventBus), Realm, Volley, Zxing, Sqlbrite, RetroLambda, Sqlbrite. I am convinced that my skills and expertise would make me an ideal fit for an Android Developer at your company.

As a skilled technical and creative collaborator with hands-on knowledge of the Android Studio, with dynamic UI Components followed by Material Design principles, among other latest tools and technologies, I feel to develop an application is all about passion and creativity work. I am confident in my ability to deliver outstanding results for your company.

Interested Areas: IoT, Kotlin, Android Auto, Android Wear, Mobile Security, Mobile Cloud, Mobile Computing, Big Data on Mobile.
Favorite libraries: RxJava/RxAndroid, Retrofit/Okhttp, Dagger 2, Butterknife, Picasso/Glide, Timber, Otto(EventBus), Realm, Volley, Zxing, Sqlbrite, RetroLambda.
Please refer to the enclosed resume for further details regarding my professional history, and feel free to contact me at your earliest convenience. Thank you for your consideration, and I look forward to speaking with you soon.

Sincerely,

Dharma Kshetri
